Ryan - thanks for the heads-up about the date - but that had already been discovered. The date as printed in the federal register is incorrect. A correction will be published on March 10 that will show the correct date of March 30.

Subject SEIS homepage

Lois,

Just wanted to notify you that the SEIS homepage states that the scoping period deadline is March 30, 2009 when the Federal Register notice says that it is March 26, 2009.
