Re: Various Water Supplies
Hedgehog Lane Area
Bradford Township, McKean County

Dear Ms. Frontino:

This correspondence is in reference to the water sampling that was recently conducted at your residence due to a potential stray gas migration that has been reported in your neighborhood.

The analysis of your water did not detect any natural gas (methane) in your water supply. There was also no detection of free gas observed in your water well bore.

Enclosed please find your water analysis results. The Department is continuing its investigation into the water supply issues in your area.

If you should encounter any problems or have questions, please call me at 814-723-3273.

Sincerely,

Brian B. Ayers
Water Quality Specialist
Oil and Gas Management
