Subject Duhring Resources Field Review

Paul,

This morning i visited all three cases for Duhring Resources.243,244, and 245. All roads and locations for cases 244, and 245 are built except for stone needs applied to roads and locations 7-14,22,21,16, and 10. Only a small amount of timber remains to be cut and that's for the pipeline coming off well D-25 and crossing Rock Run.The following wells have been drilled ,(Case 244) 7-15,13,12,11,9,8. (Case 245) D-13,28,29,30,32,33, and 34.(Case 243) the timber is cut from well 13-6 to 8 - 39 and the road is roughed in from 13-6 to 8 - 4.

I hope this is the info you needed

Thanks.
