Subject Fw: 162 Pit plan

Below Jeff references the pit plan that may be used for Duhring Resource Company Case Nos. 243-245 (Lots 7, 8, 9 and 12). I'll print a hard copy for you to review, and put it with the project folder for Lot 7 that is currently in your inbox.

Paul

Attached is the path to find FR162 pit plan for your review and comments.

I don't have the info yet to calculate the required stone volume for cases 243, 244, & 245 but maybe you can use this plan to initiate the notice to proceed anyway. There is plenty of stone on the floor for ripping if the expansion area runs out. I assumed a 4' face to calculate the stone volume but the actual face height is more like 6 feet.
