Subject Re: Status of Papco, Catalyst and Duhring projects on  
Bradford

Another key point to note is that Duhring has stated it will use a pit off of Forest Road 148 for its development. This pit was scheduled to be used for Martin Run timber sales, and was tested for this use. It appears Duhring has already used this pit for its own development. Steve Tachior of Duhring informed Sheldon that Duhring used this pit. However, Art Stewart informed Len Jedrek and Jeff Stevenson that he thought Snyder Brothers used the pit. In short, the pit issue still needs to be resolved with the Duhring cases.

Subject Status of Papco, Catalyst and Duhring projects on Bradford

Good evening Tony... As per your request, I quickly summarized the status of projects for Papco, Catalyst and Duhring. If you need additional information, please let me know... Take care... Paul
