Subject Fw: Case #188, Duhring Resources, Lot 7

Tony,

Randy Durner and I met with Arthur Stewart on October 3, 2006, near FR 103. Arthur had sent a letter to the Forest Service requesting that we mark some additional trees for OGM Case #188, Duhring Resources on Lot 7, Sheffield Twp. Specifically, Arthur wanted permission to remove a small number of trees (15-20) so that he could widen two turns and utilize an existing "skid trail" as a pipeline corridor. The areas were marked as requested, with a minimum number of trees being removed, and maps indicating the newly marked timber were mailed to both Colleen Kelly and Doug Archer (see attached email.) There should be a copy of the map in the Case #188 file.

The pipeline that Randy and I marked runs north and south between FR103 and SR948 (near the intersection of FR148.) When I visited the site yesterday, I did not see any sign of two striping along the trail. However, this is not surprising given the small number of trees that needed to be removed. In a previous email Doug Archer had advised, "If you ever want to a tree cut that may not fall within a 2 stripe, just indicate on map ... paint the word "cut" on it." I believe that is what we did.

Irregardless, if our timber crew marked the trees along the trail for cutting then there should be tracer paint on each of the stumps in question. If there is no paint on the stumps, the trees should not have been cut.

Please let me know if I can be of any further assistance.

Thank you.

Colleen,

Yesterday afternoon Randy Durner and I met with Arthur Stewart on FR 103. Arthur had sent a letter to the Forest Service requesting that we mark some additional trees for Case #188, Duhring Resources on Lot 7, Sheffield Twp. I will mail maps to both you and Doug Archer with highlighter indicating the areas

000854

where trees were marked.

Thank you.

Doug,

Please let me know if you have any questions.

Thank you,
