Subject: Re: Duhring Resources Pipeline

Jim started to ask me about this a week or two ago and I never heard anymore about it. Randy Durner and I did mark a small number of trees for a Duhring pipeline along an existing roadbed, near FR103 (?), but I have not been back to the site since then to see if the proper trees ... and only the proper trees ... were removed. I assumed that the timber sale administrator would know that based on the marked trees.

I myself would have to look for the paint on the trees. Would you like me to spin out there tomorrow afternoon and take a look?

Randy and Nate,

I was wondering if you had an opportunity to follow-up on the pipeline issue with Duhring Resources in the Cherry Run area. I know Jim talked to you about this and was wondering where we were at. If not, is there anyway you can discuss this with Sheldon. If Arthur illegally removed the trees and installed the pipeline, I plan to hold him accountable and made this clear in a letter I recently sent to him.

Let me know. Thanks.
