Date: April 4, 2008

Subject: Duhring Resources

To: Record

Met with Arthur Stewart on Fr 148 at 9:00 to discuss the pipeline installation that was done incorrectly at the time of construction.

After a field review and locating of pipeline crossing Fr 148 I noticed Mr. Stewart had one of his employees filming our meeting. Since discussion with Mr. Stewart concerning the crossing on Fr 148 was at it's conclusion I did not say anything about the filming.

Said crossing, at this time has the correct material for backfill, compaction was good and surface cap of DSD limestone was in place. I did ask Mr. Stewart to install a carsonite sign with a Duhring Resources decal and to place it on the north side of Fr 148 this is where the pipeline crosses the road.

Also attending this meeting was Dan Watson (Sale Administrator)

Jeffrey Stevenson
