Subject Duhring

Here is a progress update, no bad news. I talked with Rick Mader (DEP) today and he said that he met with Duhring 2 weeks ago about fixing a couple of the problem areas near Cherry Run that Cara and I pointed out to him. One of which was a roadbed built on the floodplain to plug a well. He said that the meeting went well and that Duhring plans to make the corrections by the end of this month, although they did not set a deadline.

I just wanted to let you know that DEP is following up on concerns we bring to their attention, and hopefully Duhring will correct them soon.

Rick will also be looking into a Brine Spill I saw while I was out biking the other week near FR160.

Thanks,
