Subject Duhring Pipeline Request

Sheldon,

As mentioned, you need to work with Mr. Stewart on-the-ground to figure out the pipeline he mentioned. I would like to see the approval from DEP that he mentioned. In addition, I would like to know if there are alternative methods, since the last well location was dropped, which is in the vicinity of the proposed pipeline. If this ends up being the only option, we will need to work with Mr. Stewart to properly install the pipeline. We will need our specialist to assist with this option if we move forward in this direction .

Please contact Mr. Stewart immediately and schedule a field meeting to work on this matter. Thank you.
