Subject OGM

Rob/Paul: Hunter has the OK from Len to cover for me. I've briefed both Hunter and Mike on my projects. I'm always available by cell phone if needed!

Projects:

OGM Case 601: 5 Wells (2014, 15, 16, 56, and 2057). Coordinate with Lester Miller to layout wells and road locations.

OGM Case 587: Seneca requested AV to be marked for pipeline. This is sale # 02154815. Check with Shell/Cindi to see if they were billed and bill was paid.

OGM Case 575: Once road use permit is ready, timber sale should be ready to mail out along with NTP. Schedule meeting with PGE to review NTP and timbersale.

OGM Case 267-Bradford: This was sent to Stan K. for marking.

Pit @ 561A: PGE would like to review since they still have material left from clearing and blasting (two different areas).

OGM Case 595 Duhring Resources (Rob has folder): I called Duhring twice regarding pit testing and Arthur did not return my calls. Check with Jeff on his availability.

OGM Case 515/517: Seneca starting pipeline construction between wells 37537, 37914, and 37913. Clearing limits flagged (no timber). Check on fence at well 37913 to make sure it is put back up once they go thru the fence.
