OGM Review for Heritage Resources

Date: August 13, 2008
Case #(s): B-028-05/08

Company: During Resources

Location During has proposed 5 wells off FR 148 in Warren County Sheffield Township, in Lot 8.

County: Warren	Township(s): Sheffield	USGS Topo: Sheffield
Access: FR148	Watershed: Cherry Run	Warrant(s): 2752 Lot(s): 8

Scope

Please refer to the project map for the well and road locations.

5- wells – XX acres

XX miles (XX feet) of new or upgraded road – XX acres

XX miles (XX feet) of pipeline – XX acres

Total impact – XX acres

Heritage Setting:

Riverine Environment	
Riverine/Upland Interface	The proposed wells are located on a slope near Cherry Run.
Upland Interior Environment	
Date of Field Check:	07/16/08
Terrain:	Rocky slope
Range of slope:	5-30%
Aspect:	
Nearest water ft/m name	Cherry Run
Bench: Elevation	
Terrace T-0, T-1, T-2, T-3	
Soil Type and Name- A, ab, Ap, B, Bc, C, E Give depth of each horizon in cm	Soil types include Earnest silt-loam, found on very stony slopes, and Hazelton channery silt loams, which are stony soils.
Rock outcrops and boulders*:	N/A
Forest Type:	Northern hardwood
Other:	

These resources are considered non-renewable, unique, specialized or particularly sensitive to human development. If the proposed actions directly or indirectly affect these features, the project is expected to comply with the Standards and Guidelines of the ANF Land and Resource Management Plan. The project design will implement conservation measures to eliminate or reduce potential impacts on these resources.

Project synopsis:

Item	Heritage Concerns	Comments			
All wells in package B-028-05/08	None
