**OGM Review for Heritage Resources**

Date: July 23, 2008  
Case #(s): B-029-05/08

**Company:** During Resources

**Location** During Resources has proposed 8 wells in Warren County, Sheffield Township. The proposed wells run in a line off an existing oil and gas road in Warrant 2445.

County: Warren	Township(s): Sheffield	USGS Topo: Sheffield/Ludlow
Access: FR148, FR162	Watershed: Cherry Run	Warrant(s): 2445 Lot(s):

**Scope**

Please refer to the project map for the well and road locations.  
10 - wells – XX acres  
XX miles (XX feet) of new or upgraded road – XX acres  
XX miles (XX feet) of pipeline – XX acres  
Total impact – XX acres

**Heritage Setting:**

Riverine Environment	
Riverine/Upland Interface	<b>The proposed wells are located on slopes near Rock Run.</b>
Upland Interior Environment	
Date of Field Check:	<b>07/16/08</b>
Terrain:	<b>Rocky slope</b>
Range of slope:	<b>15-30%</b>
Aspect:	
Nearest water ft/m name	<b>Rock Run</b>
Bench: Elevation	
Terrace T-0, T-1, T-2, T-3	
Soil Type and Name- A, ab, Ap, B, Bc, C, E Give depth of each horizon in cm	<b>Soil types include Earnest silt-loam, found on very stony slopes, and Hazelton channery silt loams, which are stony soils.</b>
Rock outcrops and boulders*:	<b>NA</b>
Forest Type:	<b>Northern Hardwood</b>
Other:	

\* These resources are considered non-renewable, unique, specialized or particularly sensitive to human development. If the proposed actions directly or indirectly affect these features, the project is expected to comply with the Standards and Guidelines of the ANF

Land and Resource Management Plan. The project design will implement conservation measures to eliminate or reduce potential impacts on these resources.

**Project synopsis:**

Item	Heritage Concerns	Comments			
All B-029-05/05 wells	None
