Subject Re: Warrant 3672 inspection

Crystal clear. Good resolution. Thanks.

Have you documented the full chronology of discussions with Duhring and Shetler about M139? If not, please do so, i.e. when did you originally discuss with each party, when did you have follow-up conversations, what were the respective responses, etc. Please provide that chronology to Lauren and myself. Thanks, Oak. Rob.

Subject Re: Warrant 3672 inspection

Rob,

I went and inspected the project again today after your email. The poor quality sawlogs in question have since been hauled in the last load of pulpwood, the operator evidently had enough room for them. He had asked to leave them if they did not fit, and that is what was reported in the inspection report from 1-21-09. All material from the decking areas has been hauled. Equipment still remains to be hauled. I left a message with Mr. Stewart that Shetler Lumber has completed hauling and that they are not interested in cutting OGM Case M139.

Does this clarity ?

Oak
